## TABLE OF CONTENTS

Table of Contents.....	p. 2
------------------------	------

### **TARGET ISSUE: Human Computer Interaction**

Editorial Preface.....	p. 3
------------------------	------

Introduction to the Special Issue.....	p. 4
--	------

Adaptive Navigation Support: From Adaptive Hypermedia to the Adaptive Web and Beyond .....	p. 7
P. Brusilovsky	

Navigating 3D Virtual Environments by Following Embodied Agents: a Proposal and its Informal Evaluation on a Virtual Museum Application.....	p. 24
L. Chittaro, L. Ieronutti and R. Ranon	

SAMIR: A Smart 3D Assistant on the Web.....	p. 43
F. Abbattista, G. Catucci, G. Semeraro and F. Zambetta	

Developing Affective Lexical Resources.....	p. 61
A. Valitutti, C. Strapparava and O. Stock	

Finding Geometrical Associations Between Meaningful Objects in the Web: A Geostatistical Approach.....	p. 84
F. Di Nocera, C. Capponi and F. Ferlazzo	

Software Environments for End-User Development and Tailoring.....	p. 99
M. F. Costabile, D. Fogli, G. Fresta, P. Mussio and A. Piccinno	

Methods and Tools for Designing and Developing Usable Multi-Platform Interactive Applications.....	p. 123
C. Chesta, F. Paternò and C. Santoro	

User Interaction with an Automated Solver: The Case of a Mission Planner.....	p. 140
G. Cortellessa, A. Cesta, A. Oddi and N. Policella	

## Editorial Preface

PsychNology Journal has now arrived to its fifth issue, particularly rich with topics and approaches and entirely devoted to Human-Computer Interaction. After dealing in the previous issues with new kinds of interfaces (Special Issue on Future Interfaces, Vol.1,n.3/4), the Journal broadens its scope now to the whole field of human interaction with technologies, a cherished theme by people interested in the 'other side of technology'. The issue has benefited from the collaboration with SIG-CHI Italy and

collects selected papers from the 'HCIItaly Conference 2003', including the prestigious contribution from Peter Brusilovsky (University of Pittsburgh), invited speaker in the Italian event and invited author here.

As Editors-in-Chief of PsychNology, we warmly thank Liliana Ardissono and Anna Goy, brilliant scholars at the Department of Computer Science (Turin, Italy), chair persons of HCITALY 2003 and flawless guest editors of this issue of PsychNology.

Luciano Gamberini
